

CAPABILITY STATEMENT

Environmental Investigation and Remediation

Eastern Shawnee – Trevet JV, LLC (ESTJV), is a tribally owned joint venture delivering comprehensive environmental investigation, remediation, and compliance solutions to the DoD and other federal, state, and tribal clients at active installations, FUDS, and other locations nationwide.

The JV combines Eastern Shawnee Professional Services' SBA 8(a) tribally owned contracting advantage, environmental services capabilities, and project control approach with Trevet's technical depth, field execution experience, and federal environmental A-E and services projects.

The JV partners deliver lifecycle portfolio services, from assessments, investigations, and studies through remedy design and implementation, monitoring and optimization, and site closure. Regulatory interaction, community relations support, and decision document development experience ensure that actions, deliverables, and outcomes at complex sites are compliant, defensible, and sustainable.

Core Competencies

Environmental Assessments, Investigations, & Studies

- Preliminary assessments and site inspections
- Data gap investigations and risk assessments
- Remedial investigations and feasibility studies
- Pilot and treatability studies
- Time critical and non-time-critical removal actions
- Proposed plan, record of decision, property transfer, and other decision documents

Environmental Remediation & Monitoring

- Emergency response, remediation, and site restoration
- Remedial designs and cost estimates
- Remedial actions, systems design, implementation, and operations
- Modeling and trend analysis
- Long-term monitoring and performance optimization

Environmental Compliance, Regulatory, and Other Support

- Community relations program support
- Environmental compliance and permitting
- Natural and cultural resources monitoring
- Interfacing with federal, state, and local regulatory agencies
- Drone surveys and reconnaissance
- GIS support, computer-aided design, and data management

Program Experience

- CERCLA, RCRA, TSCA, CWA, CAA, NEPA, and equivalent state, local, and tribal authorities
- Environmental restoration, formerly used defense, and base realignment and closure sites
- Military munitions response; above and underground storage tank; petroleum, oil, and lubricant; and low-level radiological projects
- CERCLA hazardous wastes, RCRA hazardous substances, and per- and polyfluoroalkyl substances and other emerging contaminants

Partner Experience Key Clients

01.

The U.S. Navy and Marine Corps

02.

The U.S. Army and the Corps of Engineers Districts and Centers

03.

The U.S. Air Force and the Air Force Civil Engineer Center

04.

The U.S. Space Command

05.

Other Federal, State, and Tribal Agencies

06.

Industry partners and prime contractors including AECOM, Aptim, Battelle, Bay West, Geosyntec, InDepth, Jacobs, Tetra Tech, NOREAS, Parsons, Scout Environmental, Stantec, and others

Past Performance Highlights

- Soil, groundwater, vapor intrusion, and marine sediments assessment, investigation, and remediation
- Per- and polyfluoroalkyl substances assessments, investigations, and remediation
- Long-term monitoring, including base-wide groundwater program design, implementation, and reporting
- Landfill remedy implementation, monitoring, inspections, and maintenance
- Multi-year extraction and treatment system operations, maintenance, and optimization
- MEC surveys, identification, sampling, and removal
- Emergency aircraft mishap response containment, debris removal, and stabilization
- Site management and community involvement plans
- Five-year review and remedy inspections, maintenance, and reporting

Differentiators

Tribally Owned 8(a) Advantage

Streamlined direct award procurement pathways with no sole-source dollar thresholds, supporting federal small business and tribal contracting goals.

Integrated Technical & Field Delivery

Environmental A-E and remediation services supported by compliance and regulatory experience, aligned under one coordinated JV structure.

DoD & Federal Experience

More than 400 projects nationwide at U.S. Navy and Marine Corps, Army, Air Force, and Space Command active and formerly used installations.

Regulatory Expertise

Demonstrated experience navigating complex federal, state, and tribal regulatory frameworks, leading to concurrence on long-term remedy implementation and monitoring and successful site closure.

Quality & Safety Driven Culture

Over 20 years of documented *Exceptional* and *Very Good* past performance ratings for quality, with none below Satisfactory, and no reportable safety incidents or citations.

Stewardship Mindset

The JV is committed to sustainability and environmental stewardship through a project approach that employs innovative solutions, sustainable design, green technologies, and a long-term focus on sustainability.
